Projects

CryptoGram   Web application
01-2022-present
This is a social media web app that focuses on storing the user credentials and data uploaded by the user in a decentralized manner.
i) The entire working of the application takes place in Ethereum block chain.
ii) Technologies used :
    Front end: React.js , Bootstrap, JavaScript, Web3.js.
    Smart contracts: Solidity.
    Network used: Rinkeby Test net, Cloud platform: Cloudflare(front end)
iii) Live URL: **https://cryptogram-nmit-block-chain.pages.dev/**
iv)GitHub URL: **https://github.com/AchyuthMohan/cryptogram-nmit-block-chain-**

Twitter Assist   Web App
06/2021-07/2021
i) Basically used to keep a record of relevant tweets for future check. ii)The collection of tweets is basically done using a "bot-id" which should be tagged along with the tweet.
iii)The database for the project was hosted in AWS EC2.
iv)Benefits: Easy access to important tweets can be done.
v)**Technologies used**: Python, database was dbsqlite3, Django, Flask, Twitter API, Bootstrap Source
